

Tool profile

**Breeding
simulation**

**Genetic
gain**

**Adoption
and NPV**

**Attribution and
value of information**

5 technical
inputs

5,760 profiles
x 100 paired replicates

versus check varieties,
0.5% per year calibration

625 economic states,
25-yr horizon

Sobol, Shapley,
PAWN, EVPPI

Technical

● Cycle compression

● Tool fixed cost

● Error reduction

● Program budget

● Cost reduction

Economic

● Bean price

● Discount rate

● Adoption ceiling
